

HIGH/LOW/OFF PIR OUTDOOR PHOTO/MOTION SENSOR IN IP66 ENCLOSURE WITH BLUETOOTH®

| FSP-3X1B

Designed for LED fixtures and rated for extreme temperatures; options for box or pole mounting

Fully adjustable high and low dimmed light levels

Hold off setpoint with automatic calibration option for convenience and added energy savings

FSP-3x1B

w/ Straight Nipple

w/ Drop Nipple

Adjustable via the iOS® or Android® Sensor Configuration App

IP66 rated with choice of lenses for wet and outdoor locations, and mounting heights from 8' to 40'

Adjustable time delay and cutoff delay

Description

The FSP-3x1B sensors provide multi-level control based on motion and/or daylight contribution. They control 0-10 VDC LED drivers or dimming ballasts, as well as non-dimming ballasts and, with an FSP-Lx Lens, are rated for wet and cold locations. All control parameters are adjustable via the iOS or Android Sensor Configuration App capable of storing and transmitting sensor profiles. The FSP-3x1B family is available in three configurations for mounting inside a fixture, to the outside of a fixture via a 1/2" knockout, or to a pole.

Operation

Typically, the sensor ramps lighting On to the selected High mode level when motion is detected and the ambient light level is below the hold off setpoint. After the sensor stops detecting movement and the time delay elapses, lights fade to the Low mode level. If there is no motion during the subsequent cut off time delay, the lights will turn Off. For dusk to dawn control, the integral photocell can switch the lights On and Off based on the ambient light level so that lighting remains on overnight even without motion detection.

Features

- Provides line voltage On/Off switching and 0-10VDC dimming control (FSP-311B and FSP-321B)
- Works with ballasts or LED drivers
- High and low modes fully adjustable from 0 to 10V
- Time delay from 5 to 30 minutes
- Optional cut off delay
- Adjustable ramp up and fade down times
- Optional daylighting setpoints feature automatic calibration, or permit manual adjustment

Configuration

Initial setup and subsequent sensor adjustments are made using the iOS or Android Sensor Configuration App. This app enables adjustment of parameters including high and low modes, sensitivity, time delay, cut off and more. The smartphone app is also used to initiate automatic calibration of the FSP-3x1B ambient light level setpoint. The setpoint is used to hold the controlled lighting off or at low level when there is sufficient daylight. The wireless tool stores an unlimited number of sensor parameter profiles to speed configuration of multiple sensors.

Applications

The versatile, wet location-rated FSP-3x1B is designed for installation inside the bottom of a light fixture body, to the outside of a fixture via a 1/2" knockout or to a pole. The sensor is ideal for areas such as parking facilities, gas stations, pedestrian pathways and warehouses. A choice of three lenses ensures complete coverage for mounting heights up to 40'.

- Smartphone application stores an unlimited number of sensor profiles for quick setup and adjustment of multiple sensors (download Sensor Configuration App)
- Polycarbonate construction; flame retardant, UV resistant, impact resistant, recyclable
- UL244A and UL508; IP66 rated (when fully assembled and installed) for use in wet locations
- This product meets the materials restrictions of RoHS

Installation and Wiring

Sensor Mounting Options

FSP-3x1B-S with lens mounted to enclosure

FSP-3x1B-D with lens mounted to pole

FSP-3x1B fixture mount model with no nipple or lens

An optional collar can be installed in place of the tightening nut on the FSP-3x1B. This collar is included with the FSP-3x1B-S and FSP3x1B-D

Dimming Wiring Examples

Low voltage FSP-301B-S with power pack for on/off; sensor also works with Dim-to-Off ballast or driver.

Line voltage FSP-3x1B-S wiring with dimming ballast or LED driver.
