Description

The WPPA102-W is a Bluetooth control node designed for integration with wet-listed sensors. It features an enhanced antenna capable of transmitting signals up to 328 feet (100 meters), making it ideal for outdoor applications where extended distances between system nodes are required. The controller is housed in an IP66-rated enclosure, ensuring protection against dust and powerful water jets. The housing is constructed from UV-rated nylon material and finished in black to complement commercial outdoor luminaires. This robust design allows the WPPA102-W to withstand harsh outdoor environments while maintaining reliable wireless communication within the Keilton+autani lighting control system.

Features

- Magnetic reset function: Factory settings restored by 3-second magnet proximity
- Wireless connectivity: Links to other Keilton+autani devices
- Environmental rating: IP66, suitable for wet locations
- Application: Designed for outdoor and wet location installations
- Housing: UV-rated nylon with black finish
- Antenna: Enhanced long-range capability
- Bluetooth transmission range: Up to 328 ft (100 m)

Requirement

- Requires Dim-to-Off LED drivers with 12V AUX output
- Requires a mating receptacle, ex. WSC01-AUX, BH4W Z10 (by others), sold separately
- Magnet required to reset to factory settings
